INDEX TO VOLUME 17

Subject Index

ACE, and Wechsler-Bellevue, 63
Achievement motivation, measured by picture interpretations, 289
Adjustment, and human figure drawings, 421
and self concept, 39
and values, index of, validity, 135
index based on *Q* sort, 339
Age, and perceptual learning, 222
and Wechsler-Bellevue reliabilities, 225
Anxiety, effect on memory span, 265
manifest, changes with client-centered therapy, 443
Taylor Scale, forced-choice form, 447
Autonomic reactions, and frustration, 267

Bender-Gestalt test, scoring for directionality of lines, 213
Body-cathexis, and self, 343
Books received, 78, 156, 234, 320, 402, 468
Book reviews, 76, 154, 232, 318, 399, 465

Case histories, prognostic criteria in, 163
Cattell Infant Intelligence Scale, and clinical judgment, 303
Children's Apperception Test, variations in ambiguity, 67
Client-centered therapy, and manifest anxiety changes, 443
concomitant MMPI changes, 334
for delayed speech, 122
see also nondirective therapy
Clinical judgment, in measuring infant intelligence, 303
Clinical report, utility, 297

Deaf children, and WISC performance scale, 396
Delinquency, follow-up study, 309
Draw-a-Person test, sex sequence and MMPI M-F scale, 71

Ego strength, scale predicting response to therapy, 327
Emotionality, and Index of Adjustment and Values, 135
Empathy and insight test, evaluation, 172
Epilepsy, personality factors, 429
Ethnocentrism, changes with psychotherapy, 235

Face, sex differences and cultural preferences in response to, 126
Factor analysis, parent behavior, 306
Rorschach, 261
schizophrenic symptoms, 455
Fels Parent Behavior scales, factor analysis of, 306
Frontal lobe operations, changes following, 92

Group psychotherapy *see* Psychotherapy

HTP, validity of traumatic indicator, 74
Human figure drawings, and adjustment, 421

Illusions, visual, and memory ability, 317
Index of Adjustment and Values, and level of aspiration, 206
changes in scores related to emotionality, 135
Insight and empathy test, evaluation, 172
Intelligence, deficit in schizophrenics and organics, 389
infant, measurement, 303
relation to Rorschach scores, 21
social and general, and Rosenzweig P-F study, 293
Interview, analysis of larger units, 184
analysis of pauses, 1
rating therapist's responses, 321
Involutional melancholia, and Rorschach, diagnosis, 365
I. P. A. T. Junior Personality Quiz, 436

Junior Personality Quiz, construction of, 436

Learning, perceptual, relation to age, 222
Leucotomy, changes following, 92
Level of aspiration, and Index of Adjustment and Values, 206
Levy Movement Test, and Rorschach movement responses, 195

Madeleine Thomas Completion Stories Test, description of, 139
Memory ability, and shock therapy, 317
and visual illusions, 317
Memory span, effect of anxiety, 265
Minnesota Multiphasic Personality Inventory, and changes with psychotherapy, 235, 334
and Draw-a-Person Test, 71
and measuring adjustment, 39
and personality characteristics, 142
ego-strength scale predicting response to therapy, 327
evaluation, 462
K scale, note on, 314
psychopathic deviate scale, validity, 459
test-retest stability, 217

Need achievement *see* Achievement motivation
Neurocirculatory reactions, and frustration, 267
Neurosis, diagnosis with Rorschach, 25, 110
Nondirective play therapy, research in, 177
see also Client-centered therapy
Nondirective therapy, used with shock therapy, 87
Nonintellectual Intelligence Test, 242

Organic psychosis, intellectual deficit, 389

Parent behavior, factor analysis of, 306
Personality inventories, evaluation of recent research, 45, 462

Play therapy, nondirective, research in, 177
Prefrontal lobotomy, and Wechsler-Bellevue scores, 229
Problem-solving, generalization of rigidity, 100
Projective techniques, ambiguity of stimuli, 283
  Children's Apperception Test, varying ambiguity in, 67
  use of sounds, 377
Psychosis, diagnosis by Rorschach, 110
  intellectual deficit, 389
  prognosis with case histories, 163
  schizophrenia and overinclusive thinking, 384
  and shock therapy, 79
  and group psychotherapy, 113
Psychotherapy, and the clinical report, 297
  analysis of pauses in interviews, 1
  for delayed speech, 122
  group, with psychotic patients, 113
  MMPI changes, 334
  predicting continuation with Rorschach, 16, 104
  predicting duration with Rorschach, 348
  predicting responses by ego-strength scale, 327
  predicting results with Rorschach, 8
  rating therapist's responses, 321
  techniques applied to diagnostic testing, 132
  test correlates, 235
  use of *Q* sorts in, 339

Q technique, and index of adjustment, 339

Rigidity, effects of shock therapy, 79
  in problem solving, 100
Rorschach, and effects of stress, 247, 355
  and "eye" content response, 189
  and Levy Movement Test, 195
  and process-reactive schizophrenia, 157
  and schizophrenia, cross-validation, 371
  and self acceptance, 36
  changes with psychotherapy, 235
  diagnosing involutional melancholia, 365
  diagnostic signs, 110
  discriminating neurotics and schizophrenics, 25
  effect of order of card presentation, 32
  examiner's influence, 425
  factor analysis, 261
  human movement responses, classification, 254
  predicting continuation in therapy, 16, 104
  predicting duration of therapy, 348
  predicting prognosis in paranoid schizophrenics, 199
  predicting results in therapy, 8
  relation of free association and inquiry, 359
  relation of scores to intelligence and verbal fluency, 21
Rosenzweig Picture-Frustration Study, and social and general intelligence, 293
Rosenzweig triadic hypothesis, and seizure states, 429

Schizophrenia, diagnosis by Rorschach, 25
  distorted thought processes, 50
  effects of sodium amytal, 54
  factor analysis, 455
  intellectual deficit, 389
  overinclusive thinking, 384
  process and reactive, 157
  prognosis predicted by Rorschach, 199
  Rorschach patterns, 371
Seizure states, personality factors, 429
Self acceptance, and Rorschach scores, 36
Self, and body-cathexis, 343
Self concept, relation to inferred self and adjustment, 39
Shock therapy, and memory ability, 317
  effect on rigidity, 79
  relapses during, 87
Socioeconomic status, and WISC, 58
Sodium amytal, effect on schizophrenia, 54
Stanford-Binet, IQ changes in, 153
  and WISC, 147
Stress, and neurocirculatory reactions, 267
  effect on Rorschach scores, 247, 355

Taylor Manifest Anxiety Scale, forced-choice scale, 447
Testing, communication and rapport in, 132
Tests, ACE, 63
  Bender-Gestalt, 213
  Draw-a-Person, 71
  HTP, 74
  Insight and empathy, 172
  Junior Personality Quiz, 436
  Levy Movement, 195
  Madeleine Thomas Completion Stories, 139
  Nonintellectual Intelligence, 242
  Stanford-Binet, 147, 153
  Wechsler-Bellevue, 63, 389, 403, 411, 419
  WISC, 58, 147
  reviews, 78, 156, 233, 319, 401
Therapy *see* Psychotherapy
Thematic Apperception Test, ambiguity and personality factors, 283
  Negro and white responses, 373
  women's responses, 269
Topectomy, changes following, 92

Verbal fluency, relation to Rorschach scores, 21

Wechsler-Bellevue, and ACE, 63
  and schizophrenia and organic psychosis, 389
  changes after prefrontal lobotomy, 229
  changes with psychotherapy, 235
  ranking subtests for diagnosis, 403
  reliability, age differences, 225
  sex differences in superior young adults, 411
  variability of full-scale IQ and verbal and performance IQ, 419
Wechsler Intelligence Scale for children, and socioeconomic status, 58
  and Stanford-Binet, 147
  performance scale, deaf children, 396
Women, TAT responses, 269

Author Index

The names of authors of original articles are printed in *italics*; those of authors of books and tests reviewed in Roman.

Abramson, H. A., 232
Abt, L. E., 318
Allen, J. M., Jr., 466
Allen, R. M., 195
Anderson, Helen J., 459
Anderson, Rose G., 320
Armitage, S. G., 50
Ashby, W. R., 76
Auld, F., Jr., 104

Baker, H. J., 318
Barker, R. G., 399
Baumgarten, F., 76
Barrell, R. P., 254
Barron, F., 235, 327
